

Dear ladies and gentlemen,

I look forward to introducing my experience and skills to you in a personal meeting.

In my work as a freelancer, I have already successfully implemented many projects, including the development of a crypto exchange based on React and a service for travel companies, realised with Bootstrap and PHP.

I am particularly proud of my own start-up, an online shop for a flower delivery service, which I spent over six years developing. I was responsible for the entire technical implementation, including the integration of LiqPay payment systems and search engine optimisation. Through targeted marketing measures via Google Ads, Analytics and Facebook Ads, I was able to continuously increase the shop's reach and performance. My technology stack included WordPress, JavaScript, PHP, CSS, HTML and MySQL. This project not only demonstrates my technical skills, but also my extensive experience in marketing and business optimisation.

As a passionate React developer, I am now looking for new professional challenges in Germany. With my experience as a frontend developer in Ukraine and my deep knowledge of common frontend technologies, I am convinced that I will be a valuable addition to your team.

In my career to date, I have worked on numerous challenging projects. I developed user-friendly interfaces in React for a medical project at Lead Intelligenz and ensured their smooth functionality. I also worked on a project to visualise passenger engagement data for airlines with D3.js and was part of an agile SCRUM team. At Tesseris pro I developed a UX/UI design tool based on React and TypeScript with Redux and Konva.js. In doing so, I created individual tools to improve the user experience and optimised existing functions.

Thank you in advance for your time and attention.

Yours sincerely,

Vlad P.

6.2023 - 02.2024

Participation in the German language course
Volskhochschule, Clausthal-Zellerfeld

- Language level B2

2.2023 - 05.2023

Participation in the German language course
Julya Tsibulevska School, Clausthal Zellerfeld

- Language level A1

3.2021 - 03.2022

React developer
Lead Intelligens, Kharkiv

Project: A medical project. Service for collection, processing and information output. The team of 3 developers + a mentor

Tasks: User interfaces on React and Bugfix

Comment: The project used a device to measure heart rate and blood pressure

Technologies: React/Redux/KonvaJS/TS

Environment: SCRUM AGILE, GitHub

* * *

Project: Statistical service for air passengers

Tasks: User interfaces on React and Bugfix

Comment: Statistics on passengers and their engagement

Environment: SCRUM AGILE, GitHub

02.2020 - 02.2021

React developer
Tesseris Pro, Kharkiv

Project: Service for the creation of templates in the area of UX or UI design

Tasks: Create customised interfaces, toolbar for creating design templates. Tools such as scissors by drag-n-drop, curve selection, mask, comments, share template mode. Creating vector graphics on canvas element with KonvaJS. Also responsible for constant bug fixing

Comment: Service, very similar to the Figma

Technologies: React/Redux/KonvaJS/TS

Environment: SCRUM AGILE, GitLab

09.2019 - 02.2020

Freelancer
Team of 3 developers, Kharkiv

Project: Crypto exchange
Tasks: Create customised interface on React JS
Technologies: React/Redux

09.2018 - 09.2022

Freelancer
Muse Travel, Kharkiv

Project: Travel partner service in the Carpathians
Tasks: The entire development (front-end, databases, PHP-CRUD) Event calendar with addition to the database online, LiqPay
Goals: Payment, blog on WordPress
Comment: Responsive Bootstrap layout
Google-Service: Ads, Analytics, My Business, Merchant. Facebook ads-manager HTML-Bootstrap, PHP,
Technologies: JS, MySQL-phpMyAdmin

01.2017- 02.2022

Freelancer
own Startup

Project: Online-Shop Blumenlieferdienst basierend auf WordPress & WooCommerce Das
Tasks: gesamte Design, die gesamte Entwicklung(Front-end, Datenbanken, LiqPay Zahlung), SEO sowie Marketing und Promotion
Goals: Service mit 500 Seiten und guten Google-Rankings
Google-service: Ads, Analytics, My Business, Merchant. Facebook ads-manager
Comment: Ich habe es von Anfang bis Ende komplett selbst umgesetzt
Technologies: WordPress/JS/PHP/CSS/HTML/MySQL-phpMyAdmin

12.2017 - 04.2018

Further study as a React developer*Mate Academy Online, Kiev/Ukraine***Comment:** 400 hours practice with React JS

09.2010 - 07.2011

Study: Master in Computer Science, Research Engineer*Eastern Ukrainian National University by V. Dahl
Lugansk/Ukraine***Main focus:** Automated technological process control**Thesis:** Analysis of the signal acquisition system
of the automated gamma control complex

09.2006 - 07.2010

Study: Bachelor in Computer Science*Eastern Ukrainian National University by V. Dahl
Lugansk/Ukraine***Thesis:** Automated technological process control

09.2001 - 07.2005

Study: junior specialist*College of Eastern Ukrainian National University of V. Dahl,
Lugansk/Ukraine***Thesis:** Computer programming

Professional skillset

- **Formal qualification** **Master of Computer-Science**

- **Programming basis**

Frontend:	HTML, CSS, JavaScript(TypeScript, React, D3, KonvaJS)
Backend:	NodeJS(Express, JWT access, refresh, Bcrypt, Telegram bot)
Databases:	MySQL-phpMyAdmin, MongoDB

- **Software development methods and processes**

Agile methods:	Scrum, Kanban
Vers. controll:	Git, GitHub, GitLab, Bitbucket
Databases:	MySQL-phpMyAdmin, MongoDB

- **Software architecture and design**

Design Patterns:	Singelton, Factory, Observer, MVC, MVVM
RESTful APIs	

- **Development environments and tools**

IDEs:	Visual Studio Code
Build Tools:	Webpack
Container:	Docker

- **Databases**

Relational:	MySQL
NoSQL:	MongoDB

- **Projekt management** **Jira, Trello, Slack**

- **Soft Skills**

Problem-solving ability, logical thinking, communication skills

Creativity and critical thinking Time management and prioritisation in projects

- **Mobility** **Driving licence class B, own car available**
