Dear Ladies and Gentlemen,

I am excited about the opportunity to present my experience and skills to you in a personal meeting.

As a passionate React developer, I am now seeking new professional challenges in Germany. With my experience as a frontend developer in Ukraine and my deep knowledge of common frontend technologies, I am confident that I would be a valuable addition to your team.

In my work as a freelancer, I have successfully completed a variety of projects, including the development of a crypto exchange based on React and a service for travel companies, implemented with Bootstrap and PHP.

I am particularly proud of my own startup, an online shop for a flower delivery service, which I developed over the course of six years. I was responsible for the entire technical implementation, including the integration of LiqPay payment systems and search engine optimization. Through targeted marketing campaigns via Google Ads, Analytics, and Facebook Ads, I was able to continuously grow the shop's reach and performance. My technology stack included WordPress, JavaScript, PHP, CSS, HTML, and MySQL. This project not only showcases my technical expertise but also my extensive experience in marketing and business optimization.

Throughout my career, I have worked on numerous challenging projects. I developed user-friendly interfaces in React for a medical project at Lead Intelligenz and ensured their smooth functionality. I also contributed to a project visualizing passenger engagement data for airlines using D3.js and was part of an agile SCRUM team. At Tesseris Pro, I developed a UX/UI design tool based on React and TypeScript with Redux and Konva.js, creating custom tools to enhance user experience and optimizing existing functionalities.

Yours sincerely,
Vlad P.

PRESNIAKOV VLAD

JavaScript developer

ABOUT ME

Birthdate:
30.06.1986 in Luhansk/Ukraine

Nationality:
Ukraine

Marital status:
Single

Work permit:
available

German course:
B2 level technical language

Languages:
De B2, En B1. Ru, Ua- Native

PROFESSIONAL CAREER

12.2024 - 02.2025

German specialized language course
GFN language school online,
language level B2

06.2023 - 02.2024

German course
Volskhochschule, Clausthal-Zellerfeld
language level B2

02.2023 - 05.2023

German course
Julyia Tsibulevska School, Clausthal Zellerfeld
language level A1

03.2021 - 03.2022

React developer
Lead Intelligenz, Kharkiv

Project 1:	A medical project. Service for collection, processing and information output. The team of 3 developers + a mentor
Tasks:	User interfaces on React and Bugfix
Comment:	The project used a device to measure heart rate and blood pressure
Technologies:	React/Redux/KonvaJS/TS
Environment:	SCRUM AGILE, GitHub

*   *   *

Project 2:	Statistical service for air passengers
Tasks:	User interfaces on React and Bugfix
Comment:	Statistics on passengers and their engagement
Environment:	SCRUM AGILE, GitHub

02.2020 - 02.2021

React developer
Tesseris Pro, Kharkiv

Project :	Service for the creation of templates in the area of UX or UI design
Tasks:	Creation of custom user interfaces and toolbars for designing templates. Project:	An online shop for a flower delivery service, based on WordPress and WooCommerce.
Tasks:	The entire design and complete development (front-end, databases, LiqPay payment), as well as SEO, marketing, and promotion, were fully implemented.
Goals:	A service with 500 pages and good Google rankings.
Googleservice:	Ads, Analytics, My Business, Merchant. Facebook ads-manager
Commemnt:	I implemented it entirely by myself from start to finish.
Technologies:	WordPress/JS/PHP/CSS/HTML/MySQL-phpMyAdmin

12.2017 - 04.2018

Further study as a React developer
Mate Academy Online, Kiev/Ukraine

Comment: 400 hours of practical experience with React JS.

09.2010 - 07.2011

Study: Master in Computer Science, Research Engineer
Eastern Ukrainian National University by V. Dahl Lugansk/Ukraine

Main focus: Automated technological process control.
Thesis: Investigation of the signal collection system of
the automated gamma control complex.

09.2006 - 07.2010

Study: Bachelor in Computer Science
Ukrainian National University by V. Dahl Lugansk/Ukraine

Main focus: Automated technological process control.

09.2001 - 07.2005

Study: junior specialist
College of Eastern Ukrainian National University of V. Dahl, Lugansk/Ukraine

Main focus: Computer programming

Professional skillset:

Formal qualification   **Master of Computer-Science**

Programming basis

Frontend:	HTML, CSS, JavaScript(TypeScript, React, D3, KonvaJS)
Backend:	NodeJS(Express, JWT access, refresh, Bcrypt, Telegram bot)
Databases:	MySQL-phpMyAdmin, MongoDB

Software development methods and processes

Agile Methods:	Scrum, Kanban
Vers.-controll:	Git, GitHub, GitLab, Bitbucket
Datsbases:	MySQL-phpMyAdmin, MongoDB

Software architecture and design

Design Patterns:	Singelton, Factory, Observer, MVC, MVVM
RESTful APIs	

Development environments and tools

IDEs: Build Tools:	Visual Studio Code Webpack
Container:	Docker

Databases:

Relational:	MySQL
NoSQL:	MongoDB

Projektmanagement   **Jira, Trello, Slack**

Soft Skills

Problem-solving ability, logical thinking, communication skills

Creativity and critical thinking Time management and prioritisation in projects

Mobility   Driving licence class B, own car available
